

ER diagram

The University Database has the following tables:

STUDENT(usn, name, address, date_of_birth, program_Id, semester)

DEPARTMENT(dept_Id, dept_name, HOD_Id) (HOD_Id is foreign key which references faculty_Id of FACULTY table) FACULTY(faculty_Id, name, address, date_of_join, dept_Id)

PROGRAM (program_Id, program_name, dept_Id) (Each Department offers multipleprogrammes eg: BCA, MCA are offered by CS department)

DEPENDENT(faculty_id,name,phone number,age,relation)

```
CREATE TABLE FACULTY_22PHCS004A (  
    faculty_id VARCHAR(10) PRIMARY KEY,
